

VOLUME 56

January 2018

NUMBER 1

IISE-SJDVC132 Website: <http://paulsehnenn.wixsite.com/iisesjdvc>

Theme: Networking Dinner

Date: Tue, January 23<sup>rd</sup>

6:00 PM: Networking

6:30 PM: Presentation:  
Business Assurance  
Failure Mode and  
Effect Analysis

7:30 PM: Dinner

Location: Adelphia  
1750 Clements Bridge  
Road (Across from the  
Deptford Mall)  
Deptford, NJ

Cost: **\$20.00**

RSVP **Sharry Masarek**  
[sharry.masarek@gmail.com](mailto:sharry.masarek@gmail.com)

**\*\*All are welcome to  
attend, reservation  
requested but not required**

## Happy New Year!

### January Program

#### ASQ / IIE Networking Dinner

### Lean on ISO 9001: Do it Right, Do it Effectively

The January program event is approaching quickly! The event will be a joint ASQ/IIE networking dinner this Tuesday 1/23/2018 at Adelphia (1750 Clements Bridge Rd, Deptford Township, NJ 08096). Networking begins at 6:00 PM followed by the presentation at 6:30 PM. Dinner at 7:30 PM is optional and costs \$20.00.

#### Abstract:

Many of us are faced with simultaneously managing a traditional conflict: balancing innovation in operations against stiffening process controls driven by our customers. To accomplish this, our businesses may follow several regimes in the ISO family as well some that are not: Lean/Six Sigma, FDA cGMP, BRC, and Baldrige framework, to name a few. And each of these contributes unique concepts as to how we might better manage our business.

CCL Industries East Coast Operations is made up of three manufacturing entities that work synergistically to provide value to our employees, our customers and our stakeholders. We share the best of our methods to maximize our effectiveness without compromising the uniqueness of our individual offerings. As part of our lean philosophy, we seek ways to reduce overlap (waste) across our functions.

This presentation is a case study in lean implementation. The authors walk through the progress that East Coast Operations has made in lean/Quality, from initial concept and lean training to integration with the business quality model. They also offer a structured Business Quality Management System (BQMS) that integrates the classical lean approach within a Plan-Do-Check-Act process for developing and executing its business plans

#### Speakers:

**Jake Martin** – General Manager, East Coast Operations for CCL Industries  
**James August** – Quality Assurance Managers for CCL Label (Robinsville)

## **E-Week Approaches!**

With the approach of National Engineers Week next month (February 18 – 24), it is timely to discuss the goals associated with Engineers Week and Community Affairs. Our chapter plan calls for the chapter to “serve the local community and improve the image of the Industrial Engineering profession through participation in Engineers Week Activities, student programs, and community affairs projects.”

### **Why Volunteers?**

- The obstacles to reaching students to help improve their interest and aptitude in STEM subjects are so great that we cannot rely on teachers alone. Skilled volunteers are uniquely qualified to partner with educators, students, and community leaders, who generally have little knowledge in engineering and technology.
- Many adults need information about engineering and technology to help them make informed decisions when it comes to political issues or helping their children and students make education and career decisions. Skilled volunteers have the knowledge to impart information and inspiration.
- There is a hunger for volunteer opportunities and resources among engineers and engineering students.
- Engineering employers know that employee volunteers are energized by their volunteer experiences and that energy is reflected in the workplace

The Future Cities Competition for middle grade students will be held on **Saturday, January 20th at Archbishop Carroll HS, Radnor, PA.** The event has been strongly supported by the IISE South Jersey Delaware Valley chapter since its inception when the John Carusi Middle School in Cherry Hill, NJ won the first completion in 1996 when it was held at the Franklin Institute. The Chapter has a long history of supplying financial support and time, with several members participating as judges, coordinators, or mentors. Your participation helps insure that our chapter can make a difference and ensure we move in the right direction to accomplish our goals. Our chapter sponsors the **Robert Siebeneicher II Industrial Engineering Award**; one of several special awards for which teams

compete. Check out the creative genius of the future engineers and scientist, you'll enjoy the experience. For more information check out:

[www.futurecityphilly.org](http://www.futurecityphilly.org)

The 2018 MATHCOUNTS competition is scheduled at **Rowan University** on Saturday, **Feb 3, 2018** with a snow date of Feb. 24, 2018. This completion pits individual and teams of students throughout South Jersey in a series of math challenges collimating in a winner with the top two individuals and teams competing at the state level. This year, 21 middle schools are competing, the largest group ever! The event is sponsored by the **South Jersey Chapter of the Society of Professional Engineers**. Proctors and general volunteers are needed. If interested in any volunteering opportunity; please contact John McGowan. - JPM

## ***MORE ON CHAPTER ACTIVITY***

### **New Board Members Elected!**

### **Special thanks to those who voted!**

The IIESJDVC Officers & Directors are important elements of the Chapter, providing direction and resources for achieving goals to further our profession. The programs and activities, which the chapter pursues this chapter year, will be mainly initiated by these elected members. **Please see the updated list of board members, their roles and contact information on page 4.**

## **POP QUIZ**

**Which two teams played in the very first Super Bowl in 1967?**

***See Page 4 for the answer...***

## PRESIDENT'S MESSAGE

Happy New Year to the Delaware Valley's Industrial Engineering Community!!

I would like to thank the members for voting me in another year as president of our chapter. I will continue to strive to draw members or potential members out to our events. The board has been actively trying to book tours and presentations for 2018. For the month January, we will be joining ASQ for their monthly presentation. We are hoping to book a tour with Express Scripts and SEPTA presentation for both February. If anyone has a place they would like to tour or have connections to some locations, please let me know.

For volunteer activities, we do have Future Cities and Math Counts coming up. Future Cities is scheduled is January 20th and we will be sponsoring an award. It is always great to see the projects of the next generations. If you would like to get involved with judging the competition next weekend, please email John McGowan. Math Counts will be the first weekend in February unless it snows. I believe they are looking for some more volunteers. If interested, email me at [carriannaweber@gmail.com](mailto:carriannaweber@gmail.com) to get you the details and the right contact.

Stay warm this winter!

**Carrie Weber – President**  
**South Jersey, Delaware Valley Chapter 132**

# Integrated Conveyor Solutions

**Engineered Material Handling, Production and Packaging Line Integration**

Precision Automation® has the know-how to help your business grow. We have over 65 years of experience in the automation machinery and system integration business.

Improve efficiency, increase throughput and reduce downtime with our engineered material handling solutions:

- **Complete Integration Services**
- **Conveyor Systems**
- **Arca Automation Label Applicators**
- **Control Systems**

**Precision Automation® Company, Inc.**

**Cherry Hill, NJ | (856)428-7400**
